

WORLD'S MOST **ADVANCED** BLENDER™

PLUNGER-FREE, EASY-CLEAN JAR

Patented jar design flows ingredients toward the blade, eliminating the need for a tamper.

UNIQUELY BLUNT SAFETY BLADE

Completely safe to use and clean, plus up to 80% thicker and 10 times stronger than competitor's blades.

SMART TOUCHSCREEN INTERFACE

Enables walk-away blending and doesn't harbor mold and bacteria like old-fashioned knob-and-dial blenders.

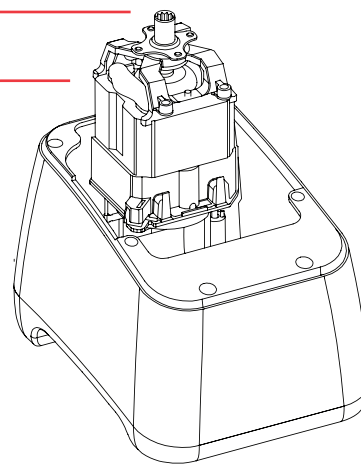

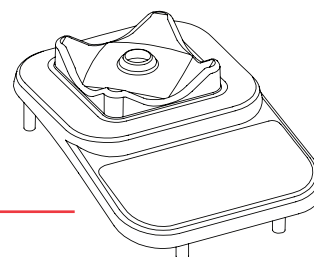

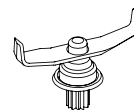

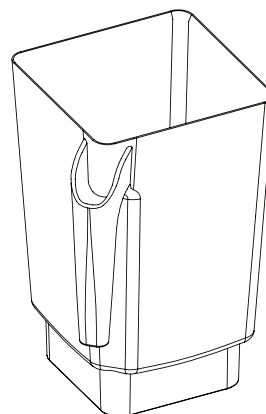

HARDENED METAL DRIVE SOCKET

Never needs to be replaced, unlike other blenders with plastic drive sockets that break under pressure.

QUIET, ULTRA HIGH-SPEED MOTOR

The industry's largest motors blend even the toughest ingredients, like ice and frozen fruit, silky smooth.
